

Module 2

Milestone Project - Part 2: Javascript Assignment

This project is in continuation to your NotesWebApp project.

In this project, you will be adding the following advanced features:

1. Create a **Backup** button.
This button will have functionality to retrieve the deleted notes. The notes which are deleted should be stored and when the Backup button is clicked it can restore the deleted notes.
2. Create a **Delete** button along with the **check box** on notes.
This will give the functionality of deleting multiple notes together. Users can select the checkbox of the notes and delete them together.
3. Create a **Search** box
Add a functionality in such a case that the user can search the notes on the basis of the name title of the note.
4. Display the **time and date** when the note was modified
Add a functionality to show the date and time of the updation of the note.
5. OPTIONAL: Create an **Archive** button.
This button will have functionality to hide the notes.
6. OPTIONAL: Create a **Show All** button.
This button will have functionality to show all the notes. This will show notes in two categories - Notes and Archived notes

NOTE: Backup, Delete, Archive and Show All button will only show when notes are added in the list.

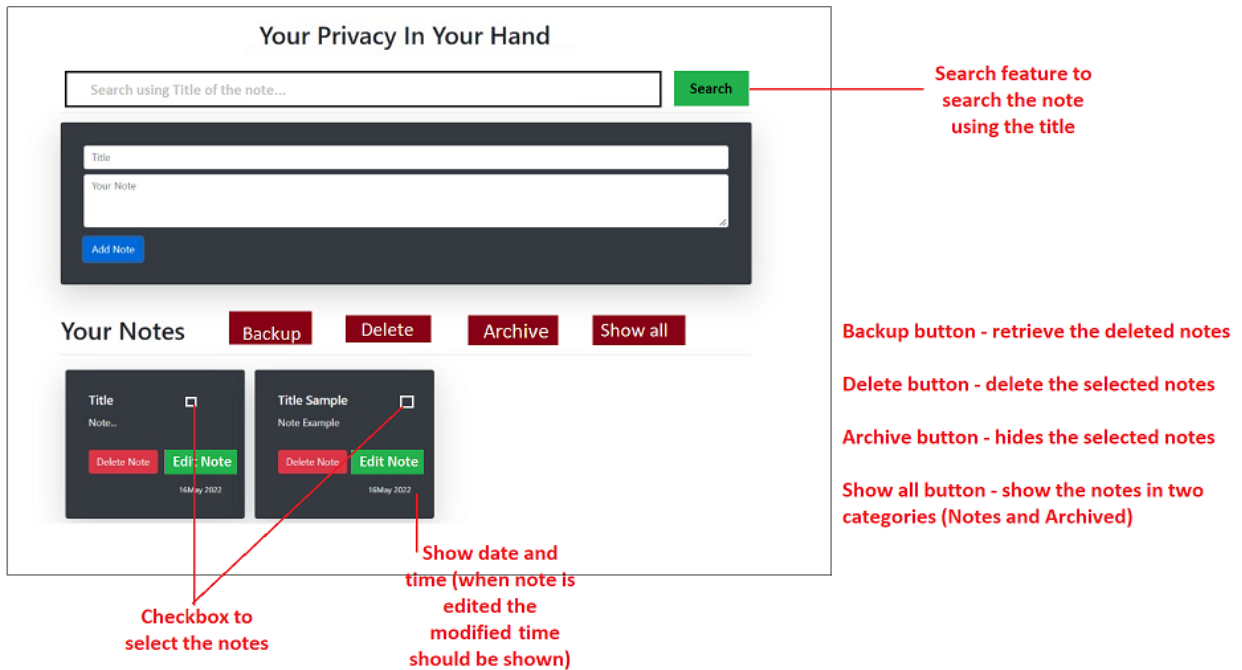

The page should look similar to this:

Before Adding the note:

A screenshot of a web application interface titled "Your Privacy In Your Hand". At the top, there is a search bar with the placeholder text "Search using Title of the note..." and a green "Search" button. Below the search bar is a dark gray rectangular box containing a form. The form has a "Title" label and a text input field, followed by a "Your Note" label and a larger text area. A blue "Add Note" button is located at the bottom left of the form. Below the form, there is a section titled "Your Notes" which currently displays the message "Nothing to show! Use 'Add Note' to add the notes." A red line points from the "Search" button to a red text annotation on the right side of the image.

Search feature to
search the note
using the title

After adding the note:

**#This image is for reference, we expect from you to show your own design but all the mentioned functionality should be there.
You can come up with your design.**
